

**BIODIESEL PRODUCTION FROM *CANDLENUT* AND *CALODENDRUM CAPENSE*  
SEEDS: PROCESS DESIGN AND TECHNOLOGICAL ASSESSMENT**

**By**

**Mogire Dennis Ndaya**

Adm. No: I56/72652/08

A thesis submitted in partial fulfillment of the requirements for the Degree of Master of Science in  
Environmental Chemistry, University of Nairobi.

**Department of Chemistry  
School of Physical Sciences  
University of Nairobi**

**2013**

## DECLARATION

I hereby declare that this thesis is my original work and has not been presented for a degree in any other university

Mogire Dennis Ndaya

Adm. No: I56/72652/08

Signature  Date 22/07/2013

This thesis has been submitted for examination with our approval as university supervisors

Prof. John Mmari Onyari

Signature  Date 22/7/2013

Prof. James A. Nyang'aya

Signature  Date 22.7.2013

Prof. Paul Mwanza Shiundu

Signature  Date 22/07/2013

Prof. Francis Mulaa

Signature  Date 22/07/2013

## ACKNOWLEDGEMENTS

I owe special debt of gratitude, appreciation and special thanks to my first supervisor Prof. John M. Onyari for guiding and supervising this research with a lot of dedication. To my other supervisors; Prof. James Nyang'aya, Prof. Paul M. Shiundu and Prof. Francis Mulaa greatest thanks for your continuous guidance, encouragement and criticism during experimental work and thesis preparation.

I say thanks to all who helped me during experimental work, technicians Mrs. Rose Mutungi, Mr. Kimega and Emma of the Physical Chemistry laboratory of University of Nairobi (UoN), Mr. Njoroge of Analytical chemistry laboratory of UoN, Mr. Alfred Odhako of science workshop of UoN, Mr. Kogi and Mr. Kennedy of the thermodynamics laboratory in the department of mechanical and manufacturing engineering of UoN. Thanks to Msc. Biochemistry students Mr. Mwangi and Mr. Nelson for their immense support during culturing of enzymes.

I express my special gratitude to Eng. Richard Kimilu for his guidance and ideas during carrying out engine tests.

Special thanks to Prof. Meroka Mbeche, Prof. Macgrey and Prof. Geoffrey Kamau, for their immense encouragement and moral support during registration of Msc course.

Thanks to Aunt Teresa, Brother Moenga, Sister Jerusha, great friends David Oseko, Benard Nyankabaria, and Beatrice Mwendu for their moral and financial support throughout my education.

Thanks to the University of Nairobi for the laboratory facilities and for providing conducive environment for studies and research work. Finally to the World Federation of Scientists and University of Nairobi I say thanks for the award of scholarships which made my studies and research work possible.

Mogire D.N.

## **DEDICATION**

I am proud to dedicate this thesis to my beloved parents Thomas Ndaya Moenga, Florence Nyaechi, Uncle Samuel Ouru, Evans Matayo and Eng. Godfrey K. Moriasi.

To Thomas Ndaya and Florence Nyaechi for their parental care, prayers, love, patience and support throughout my studies. To Uncle Samuel Ouru for his advice, encouragement and financial support. To Godfrey Moriasi and Evans Matayo for their immense moral support; without their love, encouragement and financial support I could have not reached this far.

## TABLE OF CONTENTS

ACKNOWLEDGEMENTS.....	ii
DEDICATION.....	iv
ABBREVIATIONS.....	ix
LIST OF FIGURES.....	x
LIST OF TABLES.....	xii
LIST OF APPENDICES.....	xiii
ABSTRACT.....	xiv

### CHAPTER ONE

INTRODUCTION.....	1
1.1.1 Vegetable Oils.....	4
1.1.2 Non- conventional vegetable oils.....	5
1.1.3 Biodiesel.....	5
1.1.4 Environmental Considerations.....	7
1.2 Background.....	10
1.3 Problem Statement.....	11
1.4 Objectives.....	12
1.4.1 Broad Objective.....	12
1.4.2 Specific Objectives.....	12

### CHAPTER TWO

LITERATURE REVIEW.....	13
2.0 Description of Plant Resources.....	13
2.1 <i>Calodendrum Capense</i> (Cape Chestnut).....	13
2.1.1 Geographic distribution.....	13
2.1.2 Cultivation.....	14
2.1.3 Uses and environmental importance.....	14
2.2 <i>Candlenut</i> tree ( <i>Aleurites moluccanus</i> ).....	15
2.2.1 Uses and environmental importance.....	15
2.3 Vegetable Oil Properties and Characteristics.....	16
2.3.1 Fatty Acid Methyl Esters Composition of Non-Conventional Oils.....	18
2.4 Diesel Engines.....	20
2.4.1 Indirect Injection Engine.....	22
2.4.2 Direct Injection Engine.....	22
2.5 Diesel Engine Fuel Requirements.....	23
2.6 Diesel Fuel Specification.....	25
2.7 Ignition Indices.....	25

2.8 Mechanical extraction of vegetable oil.....	27
2.8.1 Kernel pre-treatment.....	27
2.8.2 Screw-pressing.....	29
2.8.3 Oil clarification.....	29
2.8.4 Direct screw-pressing.....	30
2.8.5 Partial pre-treatment and complete pre-treatment.....	30
2.9 Solvent extraction.....	30
2.10 Production of Biodiesel.....	31
2.10.1 Pyrolysis.....	32
2.10.2 Dilutions.....	32
2.10.3 Micro-emulsification.....	32
2.10.4 Transesterification.....	33
2.11 The Process of Transesterification.....	34
2.12 Basic Transesterification.....	38
2.12.1 Steps in base catalyzed production of biodiesel.....	39
2.13 Biodiesel quality.....	42
2.13.1 Biodiesel quality testing.....	42
2.14 Enzymatic Transesterification.....	43
2.15 Variables Affecting Transesterification Reaction.....	47
2.15.1 Effect of Moisture and Free Fatty Acid.....	47
2.15.2 Catalyst type and concentration.....	49
2.15.3 Molar ratio of alcohol to oil and type of alcohol.....	50
2.15.4 Effect of reaction time.....	51
2.15.5 Effect of temperature.....	52
2.15.6 Mixing intensity.....	53
2.15.7 Effect of using organic cosolvents.....	53
2.16 Biodiesel Properties and their Tests.....	53
2.16.1 Flash point.....	54
2.16.2 Water and Sediment.....	54
2.16.3 Calorific Value.....	55
2.16.4 Kinematic Viscosity.....	56
2.16.5 Lubricity.....	57
2.16.6 Oxidative stability.....	58
2.16.7 Ash content and Carbon Residue of Petroleum Products.....	59
2.16.8 Sulfur content and Copper Strip Corrosion.....	59
2.16.9 Specific Gravity.....	60
2.16.10 Acid Number and Iodine Value.....	60
