

Mission and Vision

Vision

The School of Physical Sciences aims at providing excellence in teaching and learning of science, successful research and professional fulfillment. The School is committed to the attainment of excellence in all its scholastic and scientific endeavors and lays a lot of emphasis on the manner in which it interacts with its students and the community at large.

Mission

To provide relevant or demand-driven courses/programmes in science, producing well-informed, employable and adaptable graduates with broad skill base and a capacity for life-long learning and challenges.
